Re: OCONOMOWOC CARES – City Officials Urge Residents and Businesses to Stay Safe

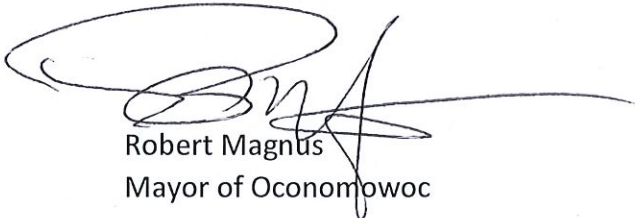

Waukesha County and Wisconsin are in the middle of an uncontrolled and drastically growing spike in cases of COVID-19. The Governor and area medical professionals have asked Wisconsin residents to stay home as much as possible, physically distance, and wear a mask.

Oconomowoc officials are echoing the same sentiment by **urging residents to wear a mask, frequently wash hands, social distance and avoid gatherings**. Similarly, we are urging businesses to require employees and patrons to wear a mask and social distance when possible in the workplace. The use of carryout services and limiting capacity in enclosed spaces are also recommended. This is the best strategy right now to keep our community safe and keep our businesses and services open.

Local public safety and other critical infrastructure are holding strong, but may be put to the test in the weeks and months to come if the current spike in positive cases is not controlled. **To prevent that from happening, we need your help!**

We are in this fight together and are all essential in controlling this pandemic. So let's put aside any differences, focus on medical safety, support our local businesses, and simply be the responsible, caring community we know ourselves to be.
